

7. Correct. The answer is true. Set $Q_d = Q_s \Rightarrow Q_d = 92.5 - 1P_d = Q_s = -13.4 + 2P_s$. -
 $3P = -105.9 \Rightarrow P = -105.9 / -3 = \mathbf{35.3}$. $Q = 92.5 - 35.3 = \mathbf{57.2}$.
