

3. Correct. The answer is false. One kilowatt hour equals 3,412 BTU or 860 kilocalorie but 920 kilowatt hours = $3,412 \times 920 = 3,139,040$ BTUs and $920 \text{ kwh} = 860 \times 920 = 791,200$ kilocalories.
